

## Specialized Services:

- Temperature-Controlled Facilities
- Raw Materials Management
- Finished Goods And Supplies
- Material Supplier Management
- Battery Sourcing Analysis
- Battery Cells Transportation
- Transportation Syncing
- Consignment Solutions
- Secure Transportation
- Multi Sourcing Transportation Management

## Types of Services:

- Vendor-Managed Inventory (VMI)
- Reverse Logistics
- Documentation Management

# BATTERY MANUFACTURING

## DELIVERING ENERGY FOR A SUSTAINABLE FUTURE

The future is bright for those who keep up with it. It happens to be true in the case of battery logistics too because batteries are the main drivers of the ongoing electrification of the world, which rapidly increases the need for reliable solutions. Whether it is for electronic devices, electric vehicles, or renewable energy storage, the need for safe and efficient battery shipping solutions is essential. However, the logistics for transport, return, and recycling are complex due to their dangerous-goods classification.

Skylink network understands the importance of safe battery shipping. We have the necessary experience, expertise, and resources to ensure that all battery shipments are transported in compliance with international regulations with proper packaging and labelling as per standards.

Skylink network's team of professionals is trained to handle all types of batteries, including lithium-ion batteries, which are commonly used in electronic devices, electric vehicles, and renewable energy storage systems. We provide end-to-end logistics solutions for battery shipping, including transportation, customs clearance, and warehousing services.
