INDUSTRIAL MACHINERY PROJECT

PRECISION MACHINERY: Seamless Logistics

Industrial machinery project that is distinguished by its particular difficulties, such as complex logistics, adhering to international standards, and the requirement for specialist handling tools. Assuring the safe, efficient, and economical delivery of huge machinery and equipment to project sites, manufacturing facilities, or distribution hubs is the main goal of industrial machinery project services.

Skylink, an industry pioneer in this field, plans routes in tremendous length, taking into account things like customs laws, transit infrastructure, and machinery dimensions. Furthermore, we collaborate with several parties, such as shipping companies, freight forwarders, and customs officials, to optimize the transit procedure. This meticulous planning minimizes delays & potential difficulties related to OOG goods and guarantees the machinery is transported without any inconvenience.

Skylink encompass a range of specialized offerings to ensure the efficient, secure, and timely transportation of heavy and oversized machinery. We ensure that industrial machinery reaches its destination safely and is ready for operational use, contributing to the success of large-scale industrial projects around the world.

CONSTRUCTION PROJECTS

CONSTRUCTION VENTURES: Complex logistics

Projects related to construction means that is responsible for providing construction sites with correct materials, equipment, and other supplies. Construction projects can seem very difficult because of their size and complexity. It's critical to plan for the most frequent issues that may come up when setting up your supply chain for construction project. The main obstacles include shipping delays, inefficient capacity use, transportation expenses, compliance, and on-site support.

One of the significant aspect of construction project services is to create efficient coordination between multiple stake holders such as construction companies, transporters, supplier & manufacturer, project managers and logistics planners. Skylink as a services provider possess extensive experience of working together with these stakeholders and this contributing to the successful and timely completion of construction projects.

Skylink offering comprehensive construction project services to the construction industry through delivering projects on schedule, mitigating logistical challenges, & enhancing the overall efficiency of the construction supply chain.

SMART UNIVERSITY PROJECT

MANAGING SUPPLY CHAIN: In the field of Education

The HEC Smart University Project marks a groundbreaking venture in advancing educational technology with a focus on integrated smart university solutions, cutting-edge infrastructure and innovative teaching methodologies, this initiative aims to create an intelligent, connected learning environment. Skylink logistics services for the HEC Smart University Project are tailored to support the procurement, transportation and deployment of the latest technologies and materials, ensuring a seamless implementation and contributing to the success of this transformative educational endeavor.

HEC the project was approved in 2015, at a total cost of Rs2.4 billion. There has been no change in the contract cost since then. Work on the project started in 2016, the main deployment of the equipment (phase-I of the project) will be completed in 2019 and is scheduled to be completed in eight years, that is 2024.

The aim of the project is to equip university campuses with blanket Wi-Fi coverage, in order to enable the deployment of other smart instruments as needed. The project has provided a suite of important services to thousands of students and faculty members across the country.
