LITHIUM BATTERIES TRANSPORTATION

FROM ZERO TO POWER-ON: Secure Transportation of Li-ion

As the world becomes more reliant on technology, the demand for batteries is increasing rapidly. Whether it is for electronic devices, electric vehicles, or renewable energy storage, the need for safe and efficient battery shipping solutions is essential. These batteries have distinct handling requirements, and not all logistics service providers are equipped with the technical knowledge needed to handle them safely and efficiently. Li-ion battery logistics are intricate & heavily controlled. In order to guarantee that your lithium batteries are handled correctly throughout the supply chain, it is important that you choose a reputable supplier with the necessary skills and experience.

Skylink combined its well-known proficiency in the supply chain industries with its in-depth understanding of compliance & hazardous material handling. Our knowledgeable staff, located all over the globe, are prepared to ensure the safety of your lithium battery supply chain from pick-up to last mile delivery.

Our team of experts is qualified to handle any kind of batteries, including lithium-ion batteries, which are widely utilized in renewable energy storage systems, electric cars, and electronic devices. We provide end-to-end logistics solutions for battery shipping, including transportation, customs clearance, and warehousing services.

HAZARDOUS GOODS TRANSPORTATION

REGULATED GOODS:

Chemical, Hazardous & Toxic Products

Dangerous or HAZMAT goods shipping can be assumed of as everything which poses a risk to life, property, or the atmosphere. Skylink simply remove these risks!

If you're our client, you have 100% assurance that at all stages for handing of hazardous goods are handled and processed with expert care and attention, in compliant with shipping regulations. This applies at the point of origin, in transit, and at the final destination point - a classic example is Chemistry, Oil & Gas, Paints, Explosives, Mining, & Global Waste.

Skylink freight forwarding division is acting as the only freight forwarding agent in Pakistan with the accreditations to transport and packing solutions for hazardous goods, around the globe.

TEMPERATURE SENSITIVE PRODUCTS

EXPERIENCE: Carrier, Packaging & Monitoring

Many types of temperature-sensitive products exist, including pharmaceuticals, biological, vaccines, blood and plasma products, organs & tissues, insulin, and food. Each category has its shipping requirements, but all must be kept within a specific temperature range to maintain their integrity and value.

Shipping temperature-sensitive product is a complex and extremely regulated process. There are many different aspects to study when shipping these products, including time, temperature, humidity, and light exposure. The packaging & labeling MUST meet strict standards, and the products must be shipped to ensure they will remain potent and effective.

Skylink network shipping experts can help to ship your temperature-controlled shipments, with a network of reliable temperature-controlled shipping carriers and specialized agents, we have over 10 years of experience, we know the ins and outs of the cold chain industry.

PERISHABLE CARGO TRANSPORTATION

PERISHABLE SUPPLY CHAIN: Articulating Quality Transportation

Transporting perishable goods is a complex procedure that requires meticulous attention and adherence to the best practices to ensure that the product arrives at its destination in the best possible form. Because all of these products are time-sensitive, they require particular shipping processes to maintain their integrity. Shipping firms must be aware and cautious while working with food and medications; if not properly controlled, these products may decay and must be lead to discard.

At Skylink we provide customized logistics solution that includes warehousing, packing, and shipping from a single source. Our team of professionals assists in the distribution of perishable items. Taking into account the time and temperature sensitivity for perishable goods transportation, we provide a comprehensive solution for producers, exporters, traders, and retailers.

Searching for Solutions:
Whether your perishable cargo is a single shipment or you wish to outsource your entire logistics operation to a third party; whether your cargo is a pallet, a full or partial reefer container, or requires charter service, Skylink can manage it!

INFECTIOUS SUBSTANCES TRANSPORTATION

ELEVATING STANDARD, PRESERVING HEALTH: Handling Infectious Substance Transportation at Its best

Shipping infectious Substances means transporting those substances which are likely to cause damage to human, environment and animal by inhalation, absorption, ingestion or also just by getting in contact with them. Toxic substances can be either a solid or liquid form. If a company involve in handling of shipping infectious substance then it should be aware of handling process, restriction that apply in shipping infectious substance and permit requirements on both end.

At Skylink, our professional team are aware of all the requirements while handling infectious and toxic substance. As we are connected with regulatory bodies, medical professionals, transportation professionals, and packaging technical experts in order to avoid any mishandling and to remove risks.

Skylink has special contract with carriers, warehouses and transport agents and these all links make us professional to conduct secure cargo operations.

GOOD DISTRIBUTION PRACTICE

DRIVEN BY COMPLIANCE, DEFINED BY STANDARDS: GDP Logistics

In the logistics industry, GDP (Good delivery Practice) certification is crucial for guaranteeing the integrity of pharmaceutical items & their secure and effective delivery. In the pharmaceutical business, GDP certification is now regarded as a worldwide standard. For any business engaged in the supply chain for pharmaceuticals, it is a legal requirement. Gaining GDP certification offers businesses a major competitive edge in the market by demonstrating their dedication to the quality and safety of pharmaceutical products.

Skylink's Good Distribution Practice (GDP) certification certifies that, as a transportation service provider, it adheres to the strictest guidelines to guarantee the preservation of pharmaceutical products' quality and integrity across the whole supply chain.

Skylink Provides end-to-end solutions to pharmaceutical business, we follow industry best practices for product distribution, transportation, and storage. Our team will provide you with comprehensive process guidance to ensure efficiency, sustainability, & traceability in a highly customized manner.

TIME DATE CRITICAL

RAPID LOGISTICS:

Meeting your Urgent needs

Time date critical shipping is the immediate professional logistics management of items that must be delivered to the client within a very specified time limit in order to avoid or eliminate supply chain challenges caused by production defaults, accidents, breakdowns, natural disasters, and other factors. However, offering time-critical services requires more deliberate shipping plan.
